

## ALGEBRA FLOWCHARTS

Follow the arrows and apply the operations to calculate the new expression to try to return to the beginning.

### TASK 1 Go with the flow

Start at the shaded ellipse to complete this flow chart by either writing the necessary operation on each arrow or writing the result of each operation in each green ellipse. Along the way, there are places where you can check your progress.

TASK 2

Test yourself

Start with  $y$  and complete your own flowchart. Ask someone else to check it for you.
